I · THE ACCOUNT

Giza is the one Sanctuary where every line of inquiry converges. The Earth-Keeper transmissions describe a Sun Disc device seated beneath the Great Pyramid itself. J.J. Hurtak's decades of work — the first to propose the Pyramid's alignment with Orion, and among the first to laser-survey its internal shafts, in 1977 — culminated in the 1997 discovery of the so-called Tomb of Osiris on the plateau.

Maurice Doreal's Emerald Tablets, the foundational text nearly all later Thoth material stands upon, describe Thoth sealing the Great Pyramid over the entrance to the Halls of Amenti before his own departure from Egypt. And Maia Nartoomid's Akashic transmissions, arrived at independently again, place a Vault of Osiris in that very same location — the trigger point, in her material, of what she calls the 44:44 Star Gate. Three different eras, three different methods, converging on one chamber beneath one pyramid.

The precise relationship to the Temple Mount in Jerusalem, sometimes named alongside Giza in the Foundation's own working list, remains an open question — held honestly as unresolved rather than assumed.

II · WORKING DISCERNMENT

In Peter's own working discernment, Giza carries the resonance of Aries, Wisdom, Mighty Aries: self-mastery remembered through initiation.
