

SUN DISC VIII · A CONFIRMED CROSS-OVER

ULURU

The Second Dove Grid

THE INVITATION

Come Stand Before What Was Never Lost

Before any word offered here about grids or gates, one fact must be stated first and held throughout: Uluru belongs, in the deepest and most literal sense, to the Anṁangu people, its traditional custodians for tens of thousands of years. This document offers what outside traditions have said about this place; it does not claim to speak for the Anṁangu, and any deeper engagement with Uluru's own meaning calls for a direct, respectful relationship with them, not a document.

Kryon material, elsewhere in this same body of work, names Mount Logan in the Yukon as the matched Null point balancing a location in Australia — and other material in the wider tradition, drawing on James Hurtak's Keys of Enoch, describes a second Dove Grid, parallel to the one threaded through the Americas, originally anchored in Australia before the wider grid's activation moved elsewhere.

In Nartoomid's more specific Akashic material, Uluru itself is named as the Throat Center of the wider Ascension Temple Grid — making this, like Hawai'i and Denali before it, one of Arkansas's confirmed cross-over points between the Sun Disc Satellites and the twelve Ascension Gates.

THE LAND ITSELF

A Monolith Older Than the Ranges Around It

Uluru rises 348 metres above the surrounding plain, a single sandstone monolith some 9.4 kilometres in circumference, its visible bulk understood to extend several kilometres further underground. Geologically, it formed from sediment deposited around 550 million years ago, later uplifted and tilted nearly vertical — among the oldest exposed rock formations on the continent.

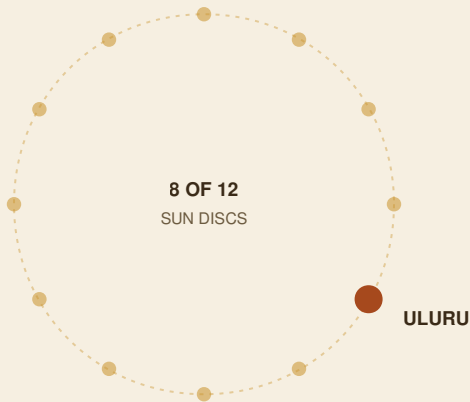

For the Anḁangu, Uluru is inseparable from Tjukurpa — the body of law, knowledge, and story that governs relationship to this land, passed down through direct custodianship rather than written record. Since 1985, the site has been formally returned to Anḁangu ownership and jointly managed with Parks Australia, with public climbing of the rock ended in 2019 at the traditional owners' explicit request.

Within the wider esoteric tradition this document draws on, Uluru additionally carries the designation of the Throat Ascension Gate — one of twelve points corresponding to the human chakra system mapped across the globe — making it, like Hawai'i's Mauna Kea and Alaska's Denali, ground independently named by two separately developed systems.

THE ORIENTATION

Its Place Among the Twelve

Among the Twelve Sun Discs, Uluru is held as anchoring a second Dove Grid originally centered in Australia — and, independently, as the Throat Ascension Gate, one of Arkansas's confirmed cross-over points.

Kata Tjuta, a separate cluster of domed rock formations roughly 50 kilometres (a 40-minute drive) west of Uluru within the same Anangu-owned park, has also been named in some accounts of this region; this document holds Uluru itself as the confirmed point, while noting Kata Tjuta honestly as the nearby alternative some material has pointed toward. It defers entirely to the Anangu people's own Tjukurpa as the primary and authoritative account of what this place is and means.

WHAT THIS GROUND OFFERS

Beginning With What a Body Needs

WATER & BREATH

Rare desert waterholes at the rock's base, sustaining life in an otherwise arid landscape for tens of thousands of years.

GROUND & SHELTER

Ancient sandstone, uplifted and tilted, its caves and overhangs used as shelter and ceremonial space by the Anangu since time immemorial.

FOOD & PROVISION

A desert ecology the Anangu have read and provisioned from with precision for tens of thousands of years, a body of ecological knowledge without parallel.

WORK & CRAFT

Rock art and cultural sites around Uluru's base, held and maintained under continuous Anangu custodianship.

WHAT THIS GROUND OFFERS

Rising Toward What a Community Needs

KINSHIP & BELONGING

Formal return of ownership to the Anangu people in 1985 — a rare and significant act of restitution, not merely symbolic.

CHILDREN & LEARNING

Tjukurpa itself: a body of law and knowledge that has been transmitted, intact, across an unbroken span of tens of thousands of years.

CULTURE & CEREMONY

Living ceremonial and cultural practice, held by the traditional owners, distinct from and prior to any outside framework laid over this ground.

REST & RENEWAL

A landscape whose scale and silence have drawn visitors from around the world for generations, alongside its far older role for the Anangu.

VISION & CALLING

Named, in the framework offered here, as both a Sun Disc anchor point and the Throat Ascension Gate — one of Arkansas's confirmed cross-overs.

Two Frameworks, One Deference

The Kryon and Hurtak-derived material describing a second Dove Grid anchored in Australia, and Nartoomid's naming of Uluru as the Throat Ascension Gate, are offered here as part of the wider esoteric tradition this document draws on — genuinely held within that tradition, genuinely distinct from any claim about the Anangu's own understanding of this place.

This document states plainly that Tjukurpa is not something an outside framework can supplement or complete. What is offered here sits alongside it, not above it — and any reader drawn to know Uluru more deeply than this document can offer is encouraged toward direct, respectful relationship with its traditional owners.

AN INVITATION, NOT A DEED

None of this replaces standing on the ground itself. A Sun Disc is not a monument and not a holiday stop — it is a place already at work, quietly, radiating outward into the land, the Satellites that will one day surround it, and the people who come looking.

Whatever draws you here — the Anangu's own unbroken relationship with this ground, or the quieter claim of a confirmed cross-over between two outside systems — the invitation is the same one this whole field of Sun Discs extends, offered always in deference to those who have never left.

*Come see if it calls to you
the way it has called to everyone
who has ever stood here and felt something larger listening back.*
